

Chevy Brush Truck

1. The key is located inside the first large bin on the left side.
2. The battery isolator, on the floor center console, must be turned on to left or right battery.
3. After starting put battery isolator to both, so both batteries will charge.
4. The truck must remain running for the duration of the outing. Do not operate pump unit without the truck running.
5. To start the pump.
 1. squeeze the primer bulb 3-4 times.
 2. the choke is located on the left underside of air cleaner, a small ring, pull choke out to the left.
 3. turn on the toggle switch, light will come on.
 4. move throttle lever to start position.
 5. push starter.
 6. when started ease the choke in, move to right.
 6. Water to hose
 1. move valve on the pump line to align with pipe to pump, you may get a sudden spray of water from fitting.
 2. hose is now charged and ready.
 7. Do not ride on back of truck in pump area. This is very un safe and can damage fittings.
 8. Always try to spray the base of the flames with fog on knozzle.
 9. You only have 200 gallons of water.
